

Ruusu Aavikko

Aspiring Software Engineer | Python

Turku, FI | +358 452047373 | ruusu.aavikko@gmail.com | [LinkedIn](#) | [Github Portfolio](#)

Computer Science student with experience building software applications and database-driven systems using Python, SQL, and web technologies. Strong interest in software development and creating reliable, user-focused solutions.

AREAS OF EXPERTISE

Programming Languages: Python • Java • JavaScript • C#

Web & Frontend: HTML • CSS

Data & Tools: SQL • Pandas • MySQL • Git/GitHub • VS Code • IntelliJ IDEA

Concepts & Other: OOP • Algorithms & Data Structures • Unity • Linux/Windows • Microsoft Office

Team & Soft Skills: Collaboration • Communication • Problem Solving • Adaptability • Time Management

PROJECTS

Stadust - A Unity 2D combat sandbox game

- Designed and implemented player controls, enemy AI, combat systems, and interactive environments; gained hands-on experience with C# scripting, Unity physics, game logic, and modular game design.
- Built melee and ranged attack mechanics, weapon pickups, and damage systems; practiced debugging, optimizing game performance, and applying principles of user-focused game design.

Oppimispeli - A web-based learning game with interactive exercises

- Web-based learning platform developed with Python for backend and HTML/CSS for frontend, providing an interactive environment to practice exercises and track progress.
- Implemented user interface, database functionality, and content management features; gained experience with Python backend development, web technologies, and full-stack application structure.

WORK EXPERIENCE

International peer tutor | University of Eastern Finland

September 2023 - December 2024

- Supported Finnish- and English-speaking students during the early stages of their studies, providing guidance and academic support.
- Organized meetings and study events, receiving positive feedback for enthusiasm and effective execution; strengthened teamwork and communication skills.

Board member | Serveri Ry

December 2023 - December 2024

- Deputy Board Member, Serveri Ry – Supported board members in their tasks and contributed to organizing events for the student community.
- Developed collaboration and organizational skills while actively participating in planning and executing student activities.

EDUCATION

Master of Science | University of Turku

September 2025 - Present

Focus on interaction techniques and game development; developing projects and skills in AI, player experience, and interactive systems.

Bachelor of Science | University of Eastern Finland

September 2022 - May 2025

Focused on software development, programming, and database systems; completed projects using Python, SQL, and web technologies.
